DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-24, 48 and 49 drawn to a method of installing a cable in an inner pathway, classified in class s 254, subclass 134.3 FT.
 - II. Claims 25-47, drawn to a conduit/plurality of ducts, classified in class138, subclass 119.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Groups II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using that product, such as one not requiring the steps of inserting a cable into said duct with the collapsible wall in an extended condition, or the step of inserting duct into the outer conduit by pulling or pushing the ducts through the outer conduit in a staggered group or in a plurality of sequential groups.

3. This application contains claims directed to the following patentably distinct species of the claimed invention: invention of figs. 1-3, the invention of figs. 4-6, the invention of fig. 7, the invention of figs. 9 and the invention of figs. 10 and 11.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 12, and 25 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable

Application/Control Number: 10/079,295

Art Unit: 3752

over the prior art, the evidence or admission may be used in a rejection under 35

U.S.C. 103(a) of the other invention.

4. Applicant is advised that the reply to this requirement to be complete must

include an election of the invention to be examined even though the requirement be

traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from

the examiner should be directed to Patrick F. Brinson whose telephone number is

(703) 308-0111. The examiner can normally be reached on M-F 7:30-3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Michael Y. Mar can be reached on (703) 308-2087. The fax phone

number for the organization where this application or proceeding is assigned is (703)

872-9306.

Any inquiry of a general nature or relating to the status of this application or

proceeding should be directed to the receptionist whose telephone number is (703)

308-0861.
